Blocking measures to unblock the first Sunday of the second phase, foreign maids generally like to gather in places such as lucky business centers and city shopping malls with no more crowds than usual. The interviewed maid told reporters that although the employer allowed them to go out on a rest day, they also worried about getting the virus themselves and dared not stay outside for a long time.

scanned the SafeEntry QR code themselves, and measured the body temperature before entering the mall.

According to the reporter's observation of half an hour in the morning, many domestic helpers came to remit money, and left after doing things, and did not stay for a long time. In addition, there was heavy downpour before noon, so few people gathered outside.

A maid revealed: "I accompanied my sister to apply for an employer change. We haven't seen you in the past three months. We stayed here for a while and went home early."

Another maid said, "The employer treats me very well and asks me to take care of myself when I go out. I came here and took something and left."

The city mall located in Tanjong Katong will occasionally see law enforcement officers remind visitors to keep a safe distance.

When asked, the Domestic Helper Center said that the offices located in these two premises and the Bai Ling Building were temporarily closed. Foreign maids who need help can contact the center staff through the hotline, WhatsApp or Facebook.

They also encourage the maid to discuss with the employer whether to change the rest day. You should also wear masks when going out, try not to share food and drink, and avoid crowds.

The FAST activity center for maids to attend classes and participate in leisure activities also remains closed.
